

# PEE BOOK 2023

Be part of a Digital Work Place

Wevioo in a nutshell :

## **OPERATIONS, TECHNOLOGIES & INNOVATION ALIGNED TO DELIVER OPERATIONAL EXCELLENCE**

**400**

**Employees**

Sharing a strong corporate culture

**24**

**Years**

Of sustainable growth

**05**

**Offices**

In Tunis, Paris, Alger, Abidjan and Dubai

**300+**

**Successful Projects**

Delivered in more than 30+ EMEA Countries

# Aligning **OPERATIONS, TECHNOLOGY AND INNOVATION TO** **MEET BUSINESS CHALLENGES AND DELIVER HIGHER** **PERFORMANCE**

## CONSULTING

- Operational Performance
- Digital Transformation
- IS Alignment & Strategy
- Change Management
- Financial Services Expertise
- Supply Chain Expertise
- Public Sector & e-Gov Expertise

## DIGITAL INNOVATION

- UX & Digital Product Design
- Agile Software Development
- API & Microservices Architectures
- Data Intelligence & AI
- RPA & Low Code
- IoT & Embedded Systems Design
- QA Testing & QA Automation

## MANAGED SERVICES

- DevOps & Cloud Services
- 24x7 & SLA-based IT Outsourcing
- IT Support & Infrastructure Services
- Application Management Services
- Network Operations Center (NOC)
- Security Operations Center (SOC)
- Back-Up / BCP / DRP Services

your CV

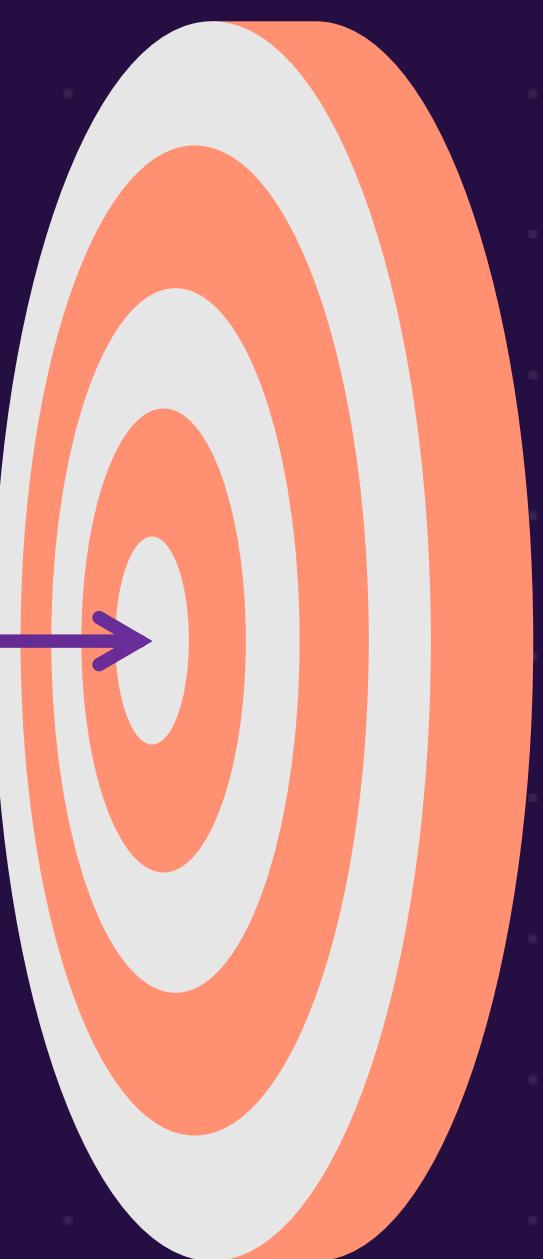

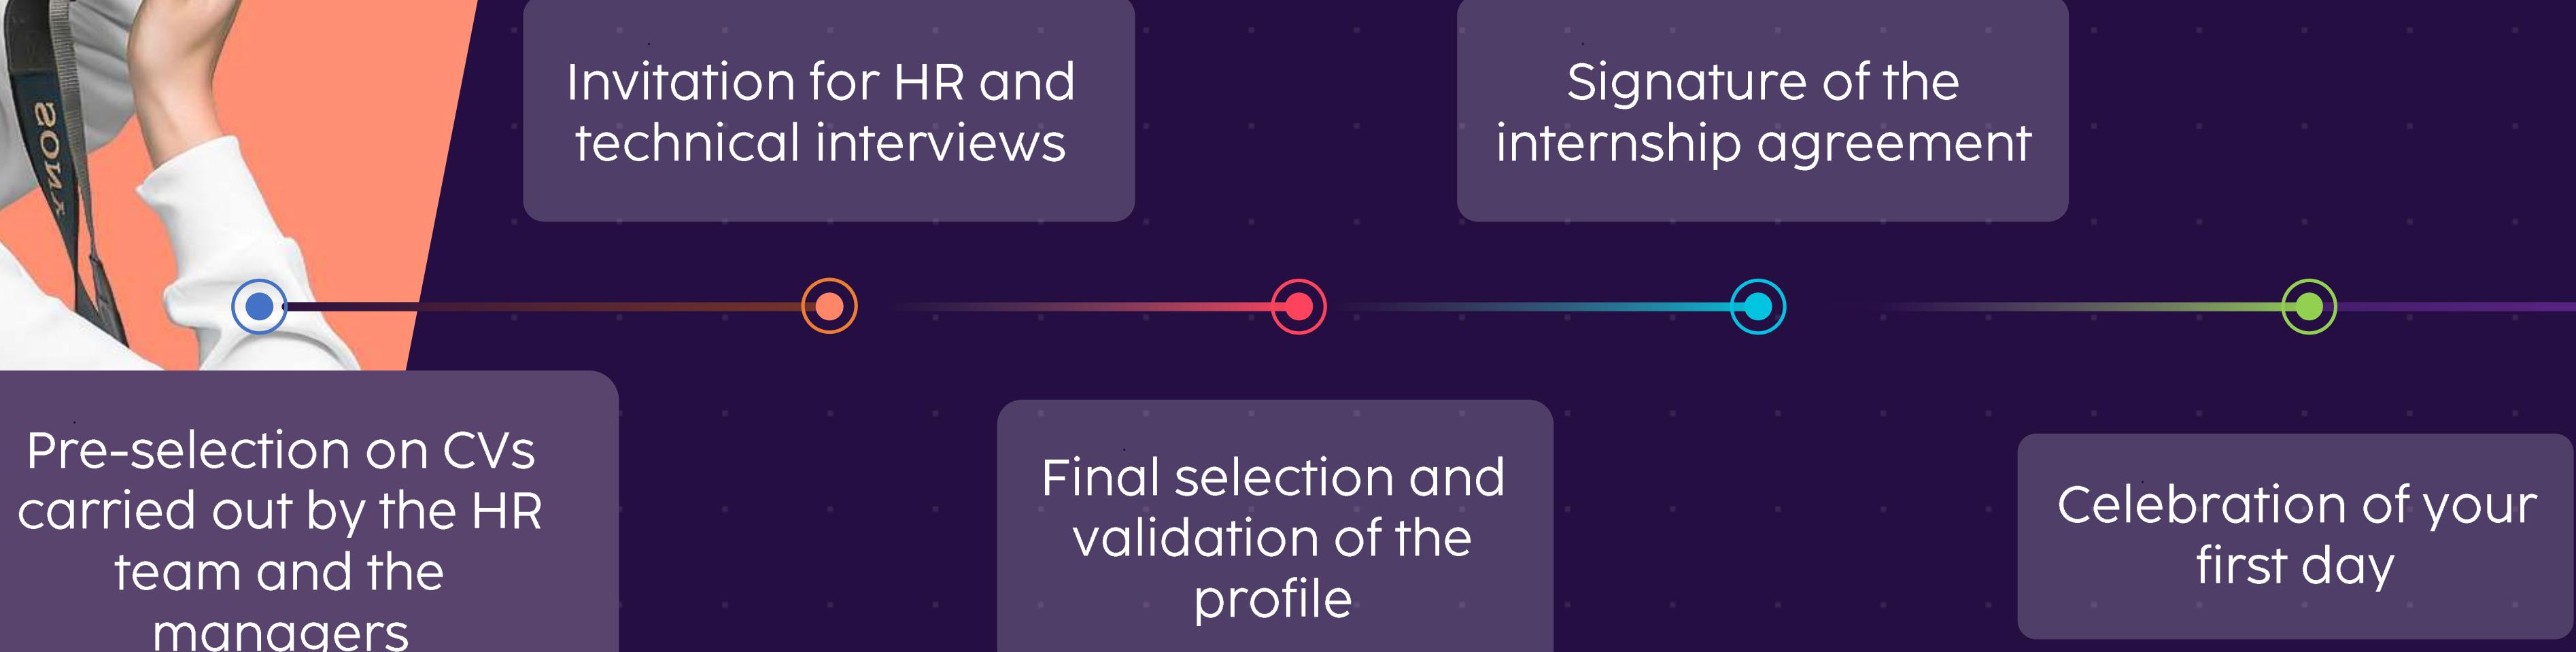

3.

Preselection  
& interviews

# Selection PROCESS

# Why **CHOOSE US**

Agile  
working  
environment

80% of our  
PFE interns  
joined our  
team

Flexible  
work  
organization  
(on site, remote,  
hybrid)

Attractive  
remuneration

Innovative  
projects

# Our PTE topics

# ISO1: IT SERVICE DESK

## Project Description :

RPA : Robotic Process Automation

The student must set up an RPA (robotic process automation) solution :  
automation of the opening supervision tickets

**Profiles :** 1

Bachelor Degree Level

**Duration :**

6 months

**Technologies :**

Open-source  
development

Send your CV with  
the reference topic  
**pfe@adactim.com**

# ISO2: SOC ANALYST

## Project Description:

Comparative analysis  
and Implementation of a multitenancy SIEM  
(open source)

The student must establish a comparative study on the various existing SIEMs and must choose a multi-tenant tool that manages several architectures at the same time on the same Dashboard

**Profiles :** 2 pairs    Engineer/ Master degree Level

**Duration :**                  4 months

**Technologies :**             SIEM, SOC, HIDS, NIDS , Linux

Send your CV with  
the reference topic  
**pfe@adactim.com**

# ISO3: SOC ANALYST

## Project Description :

Evolution of an existing SOC towards a SOAR solution

The student must understand the existing solution and propose an automation architecture, orchestration and IT security incident response (SOAR) to integrate it with the existing SIEM

**Profiles :** 2 pairs      Engineer/ Master degree Level

**Duration :**      4-6 months

**Technologies :**      SIEM, SOC, HIDS, NIDS, Linux , SOAR, Python , IA, machine Learning , Play-Book

Send your CV with the reference topic  
**pfe@adactim.com**

# ISO4: IT SUPPORT

## Project Description :

### PDCA deming wheel method

The student must master the planning of quality management system using the PDCA (plan-do-check-act) deming wheel method

**Profiles :** 1

Bachelor degree  
Level

**Duration :**

To define

**Technologies :**

Iso/system/quality/  
planning/PDCA

Send your CV with  
the reference topic  
**pfe@adactim.com**

# SE01: IMPLEMENTATION OF A NOTIFICATION PLATFORM

## Project Description :

- Set up a Web Platform that will provide notification APIs on several channels
- Allow to create several settings for each channel and to test them
- Allow to manage the templates (content and format) of the notifications
- Provide a monitoring interface, to monitor the activity of the platform
- Expose APIs to perform all possible operations
- Manage access to APIs through tokens
- Create the GitLab pipelines and Docker files needed to automate the deployment of the solution

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Java SpringBoot or NodeJS

Angular or ReactJS

Swagger

Docker

GitLab

Send your CV with the reference topic

[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SEO2: IMPLEMENTATION OF AN ELECTRONIC DOCUMENT MANAGEMENT PLATFORM

## Project Description :

- Set up a Web Platform that will allow to manage documents
- Provide a web interface to manage documents; upload, classification, metadata
- Study the possibility of using an Open-Source solution
- Provide APIs to perform all possible operations
- Provide a monitoring interface, to monitor the activity of the platform
- Categorize documents
- Advanced search on document content
- Manage access to APIs through tokens
- Create GitLab pipelines and Docker files needed to automate the deployment of the solution

## Profiles :

1 Engineer

## Duration :

6 months

## Technologies :

Java SpringBoot or NodeJS

Angular or ReactJS

Swagger

Docker

GitLab

Send your CV with the reference topic

[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SE03: IMPLEMENTATION OF A REPORTING PLATFORM

## Project Description :

- Set up a Web platform that will allow to manage PDF/Word reports
- provide a Web interface to manage the report templates
- Provide APIs to perform all possible operations on the reports
- Manage the access to the APIs through tokens
- Study the possibility of using a report generation tool like Jasper Reports
- Create the GitLab pipelines and Docker files needed to automate the deployment of the solution.

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Java SpringBoot or NodeJS

Angular or ReactJS

Swagger

Docker

GitLab

Send your CV with the reference topic

[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SEO4: IMPLEMENTATION OF A WORKFLOW MODULE

## Project Description :

- Set up a module that will allow to model and automate workflows
- Study the possibility of using an open-source workflow engine
- Provide an interface to design a workflow (BPM)
- Provide the possibility to easily integrate the module into projects; through APIs or through generated code
- Have the possibility to modify the workflow easily
- Create the GitLab pipelines and Docker files needed to automate the deployment of the solution

**Profiles :**

1 Engineer

**Duration :**

6 months

**Technologies :**

Java SpringBoot or NodeJS

Angular or ReactJS

Docker

GitLab

Send your CV with the reference  
topic  
**pfe@wevioo.com**

# SEO5: IMPLEMENTATION OF A CONTINUOUS INTEGRATION PLATFORM

## Project Description :

- Set up an application stack management platform allowing
- A modular, gradual and automated deployment of different components
- Ensure the modularity of the stack to guarantee an incremental deployment strategy
- Ensure the monitoring of the components of the stack (logs/status/used resources)
- Ensure automated deployment (local/remote)

## Profiles :

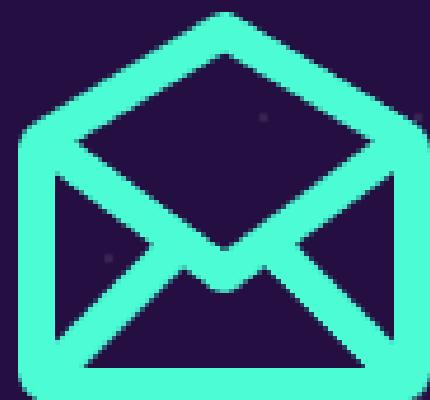

1 Engineer

## Duration :

6 months

## Technologies :

Docker  
Grafana  
Prometheus  
Fluentd  
Ansible

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SEO6: IMPLEMENTATION OF AN APPLICATION FOR SETTING UP AND ADMINISTERING THE LOGISTICS WORKFLOW COMMUNICATION

## Project Description :

- Set up a configurable workflow for equipment management
- Set up a workflow administration interface
- Set up an interface for monitoring and modifying the status of equipments
- Set up a log analysis solution

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Springboot,  
Keycloak,  
Consul,  
Angular 14,

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SE07: IMPLEMENTATION OF AN AUTOMATIC MANAGEMENT SYSTEM OF KPIS BASED ON JIRA

## Project Description :

- Design and set up an application allowing the management of KPIs based on the feedback of JIRA APIs with the integration of the notification and alert system
- Manage the different sources of JIRA data (hosts, authorizations.)
- Create an intelligent KPI generation system
- Manage projects, managers, access rights to TBD
- Set up an alert and notification system
- Develop the export mechanism of TBD in PDF

**Profiles :**

1 Engineer

**Duration :**

6 months

**Technologies :**

Symfony,  
Angular,  
PHP8, API REST, Docker,  
consul.io

Send your CV with the reference  
topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SE08: IMPLEMENTATION OF A SCRUM CEREMONY MANAGEMENT SOLUTION

## Project Description :

- Set up an application that centralize the reporting of Scrum ceremonies (Daily-meeting, Demonstration, Retrospective) with the implementation of a notification and alert system
- Manage projects and collaborators and their roles within each project
- Manage the reporting of the ceremonies
- Create a global and project dashboard
- Implement an alert and notification system

### Profiles :

1 Engineer

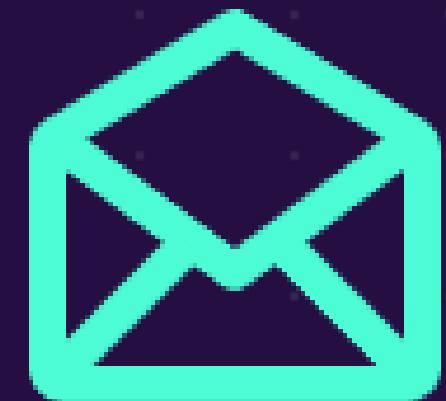

### Duration :

6 months

### Technologies :

Symfony  
Angular

PHP8, API REST, Docker,  
consul.io

Send your CV with the reference  
topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SEO9: IMPLEMENTATION OF AN APPLICATION TO DIGITIZE THE MANAGEMENT PROCESS OF GUARANTEE REQUESTS FOR LARGE FINANCINGS

## Project Description :

- Set up an application that digitize the management process of guarantee requests for large financings
- Application management: Acquisition, verification, validation
- Workflow for processing requests
- Parameterization of the referential: background, modality, status
- Management of authorizations

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Spring Boot, Architecture micro-services  
Angular 14  
Camunda  
Knowage  
Keycloak

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SEIO: IMPLEMENTATION OF AN APPLICATION FOR MANAGING FOOD RESERVATIONS

## Project Description :

This application should offer the below features :

- Providing a secured access
- Adding dishes : Description + price + photo (optional)
- Adding dessert : description + price + photo (optional)
- Consulting the day menu
- Booking the desired dish before 10 am.
- Manage reservations : add, cancel, check
- Provide a monitoring and statistical interface

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Angular/react  
Spring boot  
API REST

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SEII: DEVELOP AN APPLICATION FOR THE MANAGEMENT AND CENTRALIZATION OF CUSTOMER FEEDBACK

## Project Description :

Implement a traceability and tracking application for customer feedback for projects in the acceptance, pre-prod/maintenance phase.

**Profiles :**

1 Engineer

**Duration :**

6 months

**Technologies :** PHP8, Symfony6, React, MySQL, API  
Rest, Docker, GitLab, Redmine

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SE12: DEVELOPMENT OF A COMPETENCE MANAGEMENT PLATFORM (WESKILLS)

## Project Description :

Set up a platform composed of two spaces (recruiter space and candidate space) for skills management.

**Profiles :** 2 Engineer

**Duration :** 6 months

**Technologies :** PHP8, Symfony6, Angular14, Docker, GitLab

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# SE13: DEVELOPMENT OF A TECHNICAL DOCUMENT GENERATOR

## Project Description :

Implement a platform for the creation and generation of technical/functional..

**Profiles :** 2 Engineer

**Duration :** 6 months

**Technologies :** PHP8, Symfony6, Vue.js, Docker, GitLab, SharePoint API

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# MCO1: IMPLEMENTATION OF AN APPLICATION TO AUTOMATE RESUMES

## Project Description :

- Develop an application to automate the generation of CVs, project sheets and business cases

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Melkart

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# MCO2: BI

## Project Description :

Implementation of a data testing application

**Profiles :**

1 Engineer

**Duration :**

6 months

**Technologies :**

Java

Angular

Postgresql

Send your CV with the reference  
topic  
**pfe@wevioo.com**

# MC03: IMPLEMENTATION / IMPROVING THE BIAX PROJECT

## Project Description :

- Improve the current reports on Power BI
- Improve the current Data pipeline
- Develop new dashboards

**Profiles :** 2 Engineers

**Duration :** 6 months

**Technologies :** Talend  
Power BI  
Postgresql

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TCO1: IMPLEMENTATION OF AN HR APPLICATION FOR RECRUITMENT AND SKILLS MANAGEMENT

## Project Description :

Build a low code web application for the HR team to manage the recruitment life cycle:

- Automate the screening process
- Manage HR and technical interviews
- Keep track of candidates' profiles and skills

### Profiles :

1 Engineer  
1 license

### Duration :

6 months

### Technologies :

Outsystems  
.net  
React

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TCO2: IMPLEMENTATION OF AN HR APPLICATION FOR RECRUITMENT AND SKILLS MANAGEMENT

## Project Description :

Build a low code web application for the HR team to manage the recruitment life cycle:

- Automate the screening process
- Manage HR and technical interviews
- Keep track of candidates' profiles and skills

**Profiles :** 1 Engineer  
1 license

**Duration :** 6 months

**Technologies :** Low code  
java  
JSP  
HTML  
API

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC03: IMPLEMENTATION OF AN APPLICATION FOR MANAGING TEMPLATES AND SETTINGS OF AN AUTOMATIC CONTENT EXTRACTOR FROM PDF DOCUMENTS

## Project Description :

- A mix of Low Code and AI based application that automatically extracts the content of any document given its basic structure (section, tables, etc.)
- Documents will be uploaded to the web app, passed over to the OCR module for content extraction. The result will then be displayed in a dedicated user interface

## Profiles :

2 Engineers

## Duration :

6 months

## Technologies :

Low code  
java  
JSP  
HTML  
API

Send your CV with the reference topic

[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TCO4: IMPLEMENTATION OF A PLATFORM FOR MOBILE APP GENERATION IN LOW CODE MODE

## Project Description :

Set up a platform allowing users to create a mobile cross-platform application from the definition of a business workflow and associated screens

.net

**Profiles :** 2 Engineers

**Duration :** 6 months

**Technologies :** Flutter  
Dart  
Low code  
database  
SQL

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC05: IMPLEMENTATION OF AN HR APPLICATION FOR CV MANAGEMENT AND CV GENERATION ON DEMAND

## Project Description :

- Set up an HR application for CV management
- Data processing of a PDF or Word CV
- CV management module according to the needs of the sales and HR team
- Management of multilingual versions of a CV

### Profiles :

1 Engineer  
1 License

### Duration :

6 months

### Technologies :

Outsystems  
.net  
React

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC06: IMPLEMENTATION OF AN HR APPLICATION FOR CV MANAGEMENT AND CV GENERATION ON DEMAND

## Project Description :

- Set up an HR application for CV management
- Data processing of a PDF or Word CV
- CV management module according to the needs of the sales and HR team
- Management of multilingual versions of a CV

### Profiles :

1 Engineer  
1 License

### Duration :

6 months

### Technologies :

Low code  
java  
JSP  
HTML  
API

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC07: IMPLEMENTATION OF AN HR APPLICATION FOR CV MANAGEMENT AND CV GENERATION ON DEMAND

## Project Description :

- Set up an HR application for CV management
- Data processing of a PDF or Word CV
- CV management module according to the needs of the sales and HR team
- Management of multilingual versions of a CV

### Profiles :

1 Engineer  
1 License

### Duration :

6 months

### Technologies :

Outsystems  
.net  
React  
API  
Python

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC08: IMPLEMENTATION OF A LOW CODE PLATFORM FOR DATA SCIENCE AND ARTIFICIAL INTELLIGENCE PROJECTS

## Project Description :

Set up a platform allowing a user to realize AI and data science projects from the definition of a data workflow and AI models

## Profiles :

2 Engineers

## Duration :

6 months

## Technologies :

Python  
Pycart / KNIME  
airflow  
Low code  
SQL

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC09: IMPLEMENTATION OF AN OPEN INNOVATION PLATFORM

## Project Description :

Set up a platform for networking and Open Innovation to connect national and foreign companies with competent and innovative actors to promote collaborative innovation

### Profiles :

2 Engineers

### Duration :

4 months

### Technologies :

Low code  
java  
JSP  
HTML  
API

Send your CV with the reference topic

[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC10: IMPLEMENTATION OF MODULES FOR AUTOMATIC COLLECTION AND VALIDATION OF TENDERS

## Project Description :

Realization of modules for automatic collection and validation of tenders from specialized sites, using natural language processing (NLP) and Machine Learning algorithms

### Profiles :

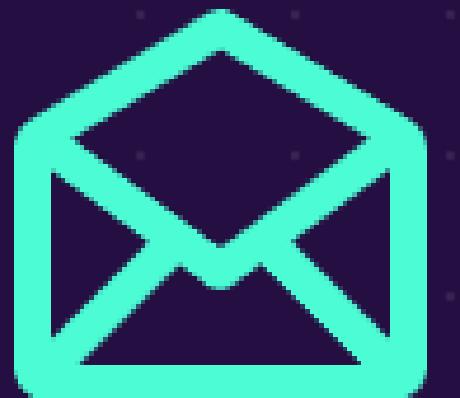

2 Engineers

### Duration :

4 months

### Technologies :

Python  
NLP

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC11: ONLINE STORE GENERATOR

## Project Description :

### Back Office:

- Management of products, brands, categories
- Order tracking
- Delivery management
- Statistics module (order, rating, customer, cart...)
- Front Office configuration

### Front Office:

- Dynamic home page
- Combination of filters

### Profiles :

1 Engineer  
1 License

### Duration :

4 months

### Technologies :

OutSystems  
.net

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TC12: MANAGEMENT OF A COMPANY'S ASSETS (GENERAL RESOURCES)

## Project Description :

- Management of requests for employees
- Stock management
- Management of orders
- Warranty follow-up
- Follow-up of the state and the depreciation
- Management of material assignment and reassignment (paper or email generation or application workflow)
- Management of repair/maintenance/replacement requests

### Profiles :

1 Engineer  
1 License

### Duration :

4 months

### Technologies :

OutSystems  
.net

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# TCI3: IMPLEMENTATION OF A PLATFORM FOR KNOWLEDGE SHARING, MUTUAL AID AND TECHNICAL ASSISTANCE (WE SHARE)

## Project Description :

Realization of a Forum :

- Solving technical and logical problems
- Knowledge sharing
- Ranking

## Profiles :

1 Engineer  
1 License

## Duration :

4 months

## Technologies :

OutSystems  
.net

Send your CV with the reference  
topic  
**pfe@wevioo.com**

# LCO1: PROCESS AUTOMATION – MULTI-CHANNEL APPLICATION DEVELOPMENT – APPLICATION MODERNIZATION

## Project Description :

- Taking responsibility for technical solutions based on market-leading low-code platforms such as OutSystems or Microsoft Power Platform
- Set up applications, workflows, APIs and integration with backend systems
- Supporting the development and introduction of low code platforms at our customers, on customer systems or in the cloud

## Profiles :

3 Engineers

## Duration :

6 months

## Technologies :

HTML

CSS

javaScript

Affinity for UX & UI design

English skills

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# FLO1: IMPLEMENTATION OF A SOLUTION THAT AIMS TO OPTIMIZE SERVICE DELIVERY THROUGH AUTOMATION

## Project Description :

You will be part of an international DevOps feature team working in a SCRUM based project “SmartOps” which is an NTT DATA solution that aims to optimize service delivery through automation.

You will be asked to

- Implement user stories
- Test implemented features
- Enhance existing features

## Profiles :

3 Engineers

## Duration :

6 months

## Technologies :

Java 8/11  
REST Webservices  
React /Angular  
Oracle & Postgre DB  
Docker & Kubernetes  
Agile & DevOps Mindset  
English is a must have

Send your CV with the reference topic  
[pfe@wevoo.com](mailto:pfe@wevoo.com)

# MLO1 : ENHANCED DATA ENGINEERING PIPELINE

## Project Description :

- You will be part of SmartOps team which is an NTT DATA solution that aims to optimize service delivery through automation
- You will Implement standard text preprocessing algorithms (stopwords, RegEx.)
- You will Investigate and Implement Machine Learning algorithms to apply advanced text processing for user incidents
- You will Evaluate and Test your solution on different datasets from different customers
- You will Package and Implement a CI/CD Pipeline for your application

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Python  
PyTorch or TensorFlow2.0  
Proficient English level

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# ML02 : BASED TRANSLATION ENGINE

## Project Description :

- You will be part of SmartOps team which is an NTT DATA solution that aims to optimize service delivery through automation. Your mission will be to
- Build an End-to-End German-to-English Translation Engine.
- Fine-tune Translation module on customer data and special tokens.
- Implement Token Tagging (Word vs. Customer-specific product)
- Plan and investigate extension to multi-language-to-multi-language translation models
- Containerize your application and Implement a CI/CD Pipeline

## Profiles :

1 Engineer

## Duration :

6 months

## Technologies :

PyPython

PyTorch or TensorFlow2.0Flask

Docker & Kubernetes

Agile & DevOps Mindset

English is a must have

Send your CV with the reference topic

[pfe@wevioo.com](mailto:pfe@wevioo.com)

# MLO3: OPTICAL CHARACTER RECOGNITION (OCR) ENGINE

## Project Description :

- You will be part of SmartOps team which is an NTT DATA solution that aims to optimize service delivery through automation. Your mission will be to
- Implement an Image-To-Text algorithm
- Containerize your application and implement a CI/CD Pipeline

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Python  
PyTorch  
Flask  
Docker & Kubernetes  
Agile & DevOps Mindset  
English is a must have

Send your CV with the reference topic  
[pfe@wevioo.com](mailto:pfe@wevioo.com)

# MLO4: ENHANCED APPLICATION LOG-FILE ANALYSIS

## Project Description :

- You will be part of SmartOps team which is an NTT DATA solution that aims to optimize service delivery through automation. Your mission will be to
- Investigate state-of-the-art Solutions.
- Implement Application log analysis algorithms
- Evaluate and Test your algorithm on 3 different applications
- Integrate application in SmartOps architecture to enabling alerting
- Containerize your application and implement a CI/CD Pipeline

### Profiles :

1 Engineer

### Duration :

6 months

### Technologies :

Python  
PyTorch  
Flask  
Docker & Kubernetes  
Agile & DevOps Mindset  
English is a must have

Send your CV with the reference topic
